Re: Docket # 2007-41-W

Mr. Terrini.

Regarding the above mentioned docket, it is imperative that this project proceed as planned. The water or lack there of, has produced an almost unbearable situation. Low pressure or lack of water has limited our everyday use; from flushing toilets, Washing our cars, watering our lawns and who knows, maybe even drinking water. It would be a huge disappointment if this project is delayed or held up for any reason.

Thank you for anything you can do to speed this along

James W. Delly
